

Department of Information Technology

The Core of State Government

01 High-Speed Internet for Every Student

Working to bring high-speed internet to every classroom

Getting our communities – large and small – online

Worked with internet providers to make high-speed internet affordable for schools

02 Making Government More Transparent

Created online database of all state contracts and agency budgets

Began webcasting and archiving public meetings

Made it easier for the public to view state employee salaries

03 Keeping Our First Responders Connected

Dramatically improved communication networks for law enforcement agencies

Received \$55M in federal grant money to upgrade 64 old technology Microwave Sites to Broadband Digital Microwave Technology radio towers state wide

04 Saving Taxpayer Dollars

SHARE system now more efficient and useful

State now enabled to balance checkbooks and reconcile cash accounts

Paper-based processes are eliminated (i.e. employees can now receive electronic pay stubs)

Implemented nation-leading high-tech state payroll system
